REMARKS

The figures of births and deaths shown in this statement for week ending the 19th March, 1955, relate to 222 towns with an estimated population of 30,239 thousands. The total number of towns is 300 and their population is 38,988 thousands. Thus 74% of the total number of towns representing 78% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 15,789 and 6,974 representing birth and death rates of 27.2 and 12.0 per thousand of population respectively.

(A) States (Parts A and C) :—The data here relate to 195 towns with an estimated population of 27,641 thousands. Information about Ajmer, Bihar and Bhopal, could not be included. The total number of towns is 252 and their population is 32,572 thousands. Thus 77% of the total number of towns representing 85% of the total population is covered. The number of births and deaths recorded in these towns were 14,964 and 6,399 representing

birth rate and death rates of 28.2 and 12.0 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(B) States (Part B) :—The data here relate to 27 towns with an estimated population of 2,598 thousands. The total number of towns is 48 and their population is 6,416 thousands. Thus 56% of the total number of towns representing 40% of the total population is covered. The number of births and deaths recorded in these towns were 825 and 575 representing birth and death rates of 16.5 and 11.5 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
